

Connect the Dots

FOR A STRONGER WIRELESS CONNECTION

With Managed Wi-Fi, you can call the secret to reliable whole-home Wi-Fi a mystery solved.

Managed Wi-Fi...

- Can handle more of your devices than a basic router.
- Adapts to interferences from outside sources, such as your neighbor's Wi-Fi.

When Wi-Fi signals on the same frequency overlap, it can cause interference in your connection. The Calix GigaSpire Blast used with Managed Wi-Fi can detect when other signals are hampering yours, and will switch to another less crowded frequency. The GigaSpire Blast does this automatically, without any interruption to your service.

- Makes troubleshooting easy if you do encounter issues.

Managed Wi-Fi routers have a convenient dashboard our support team can access to see exactly what the problem is and where it is happening. This allows us to resolve any potential issues quickly and remotely.

ONLY \$9.95 /per month

Turn an old desk into a stylish and functional kitchen island. This video takes you step by step through the process.

FAQ / TUTORIAL

HOW DO CHATBOTS WORK?

Question: Many of the websites I visit have chatbots, which pop up and ask me if I have questions or need help. How do chatbots work?
