DFT Wireless uses long-range wireless technology to deliver higher internet speeds than satellite, cellular, and DSL right to you! Unlike satellite internet that sends a signal through space, DFT Wireless sends data to your receiver from towers located here on Earth. This means you get a faster, more reliable connection that stays consistent in the worst WNY weather. Add Managed Wi-Fi for only **\$9.95/month**, to have a professionally monitored network with less interruptions and headaches.
